ABOUT NOTABLE FRONTIER

With the influence of the digital waves, people around the globe are increasingly tech-savvy. While businesses are increasingly being done online, it is important that your greatest assets – information and data, are being secured in the digital world.

Notable Frontier thrives to strengthened partners and clients' businesses across South East Asia through strong cyber security threats defense solutions on data security. Here at Notable Frontier, we also provide companies solutions on meeting compliance and regulation requirements of the global security standards.

Our company is built around a team of experts, each having years of IT expertise and achieved various accomplishments throughout their years of honing their respective crafts. The wide-range of customizable IT solutions and services includes security, networking and emerging technologies offerings around the globe.

Notable Frontier focuses on tackling cyber security threats for organizations with their cyber security solution offerings, which includes Data Loss Prevention (DLP), Insider Threat Management (ITM), Managed File Transfer (MFT), Network Traffic Analysis (NTA), Security Orchestration, Automation and Response (SOAR), Mobile Apps Security, Two-factor Authentication.

Rest assured as all Notable Frontier's IT Solutions offerings ensures organizations are able to meet and comply the security standards requirements, which includes General Data Protection Regulation (GDPR), Personal Data Protection Act (PDPA), California Consumer Privacy Act (CCPA), Payment Card Industry Data Security Standard (PCI-DSS), and the Malaysian Risk Management in Technology (RMiT).

Notable Frontier provides not only IT Solutions and Compliance Services, but also a Managed Security Service Provider. High-availability security operation centers are being used to provide 24/7 services designed for clients and optimizes their operational security personnel cost.

CYBER SECURITY SOLUTIONS JARGONS

Data Loss Prevention (DLP) : A set of tools and processes used to ensure that sensitive data is not lost, misused, or accessed by unauthorized users

Insider Threat Management (ITM): The process of preventing, combating, detecting, and monitoring employees, remote vendors and contractors, to fortify an organization's & data from insider threats such as theft, fraud and damage.

Managed File Transfer (MFT) : A technology platform that allows organizations to reliably exchange electronic data between systems and people in a secure way to meet compliance needs

Network Traffic Analysis (NTA) : A method used to analyze, control and monitoring of business processes and workflows in order to detect and respond to security threats.

Two-factor Authentication: A security process in which users provide two different authentication factors to verify themselves.

Mobile Apps Security: An extended protection for mobile device applications (apps) from malware and the activities of crackers and other criminals, minimizing the risk of exploits to mobile devices through the apps.

Security Orchestration, Automation and Response (SOAR): A solution stack of compatible software programs that allow an organization to collect data about security threats from multiple sources and respond to low-level security events without human assistance.
